

# AMD HD3D Technology Cheat Sheet

Don't just watch it, become immersed in it with AMD HD3D Technology.

Feeling like you are a part of the action has never been more exciting. Play video games in explosive stereoscopic 3D. Watch the latest Blu-ray blockbusters in eye-popping 3D. Make photos come to life with 2D to 3D conversion support. Plus, convert 2D videos and movies to 3D. Give your customers a colorful new dimension of digital entertainment. Give them AMD HD3D technology.

## Why AMD HD3D technology?

AMD HD3D technology provides an incredibly broad selection of 3D solutions and support: hardware, software and expert advice. This gives your customers an array of cost-effective choices when building their computer and stereo 3D system.

## What's needed to bring 3D to life?<sup>1</sup>

- ATI Radeon™ graphics or AMD Radeon™ graphics
- 3D-capable monitor or 3DTV<sup>2</sup>
- Stereo 3D conversion software
- 3D glasses for your display

## Get Radeon™ in your system.

\*Blu-ray 3D playback is available through CPU acceleration versus GPU acceleration which is only available on select AMD Radeon™ HD 6000 Series graphics products. CPU requirements for ATI Radeon™ HD 5000 Series products can be found by visiting software partner websites (i.e. Cyberlink, Arcsoft) for more information.

<sup>1</sup>AMD HD3D is a technology designed to enable stereoscopic 3D support in games, movies and/or photos. Additional hardware (e.g., 3D-enabled panels, 3D-enabled glasses/emitter, Blu-ray 3D drive) and/or software (e.g., Blu-ray 3D discs, 3D middleware, games) are required for the enablement of stereoscopic 3D. Not all features may be supported on all components or systems—check with your component or system manufacturer for specific model capabilities and supported technologies. AMD HD3D technology is enabled on ATI Radeon HD 5000 Series GPUs and above using Catalyst 10.10 or later, however Blu-ray 3D playback is only supported on AMD Radeon HD 6000 Series GPUs and above.

<sup>2</sup>Catalyst 10.10 or later required.
