

Fact Sheet

Logitech StreamCam

Share Your Passion in Full HD

Announcement Date: February 11, 2020

Shipping: April, 2020

Product Description

Share your passion with Logitech® StreamCam. Featuring smooth, accurate 1080p/60 fps video and support for full HD vertical capture, it's the perfect camera for Twitch, YouTube, Facebook and Instagram stories or anywhere else you broadcast content.

Logitech StreamCam features AI-enabled smart auto-focus and exposure, and versatile mounting options so you're always seen in your best light and at the perfect angle. Premium audio performance guarantees you sound vibrant and authentic to your audience at all times. Plus, advanced Logitech Capture software lets you enhance your content with multiple cameras, live text overlays, video transitions and other professional studio controls.

Key Features

- **Full HD 1080P at 60 fps:** Enjoy full HD 1080P at 60 fps for an ultra-smooth, high-quality streaming experience.
- **Versatile Mounting Options:** Achieve the perfect angle every time, with enhanced mounting versatility including compatibility with a universal monitor mount or a tripod mount.
- **Connects with USB-C:** The standard for fast and reliable connections, StreamCam uses USB-C to ensure maximum video transfer speed and quality.
- **Supported by XSplit and OBS:** StreamCam is compatible with OBS (Open Broadcaster Software) and XSplit so you can effortlessly stream to Twitch and other platforms.

When coupled with [Logitech Capture](#), the following features are also available:

- **Smart Auto-Focus & Exposure:** Built-in AI features keep you perfectly clear and looking your best so that your content looks professionally produced.
- **Full HD Vertical Video:** If you're creating content for portrait formats like Instagram or Facebook stories, simply turn the camera to automatically start recording in vertical video.
- **Auto-Framing:** to keep you framed front and center automatically in all your streams and videos.
- **Electronic Image Stabilization:** Reduces camera shake when moving the camera or the desk while sharing your passionate moments.
