| Complete Network Protection | Solutions for servers, desktops, laptops |
| Free Business Technical Support | Fast answers so you can get back to business |

NEW

Simple, User Interface

NEW Scanning Engine

AVG's 2016 Business Editions have our latest scanning engine which allows you to:

- Stop emerging and known threats from viruses, spyware, worms, rootkits, and Trojans with advanced algorithms
- Speed and simplify the scanning process with boot-time scanning, scheduled scans, and on-demand scans
- Minimize false alarms with advanced heuristics
- Identify the newest, latest malware with cloud-based, real-time outbreak detection and proactive artificial intelligence detection capabilities

Better Protection

Better protection against even the newest malware thanks to cloud-based, Real-Time Outbreak Detection and proactive AI Detection

- Real-Time Outbreak Detection is AVG's new crowd intelligence that's been added to our Outbreak Detection technology that identify even the newest malware variants and outbreaks in real-time.
- AI Detection uses advanced artificial intelligence on your PC to proactively identify malware samples that haven't yet been catalogued by our Virus Lab team.

NEW

Data Safe

Data Safe protects your company and client data from attempted theft to help ensure the health of your business and reputation.

Data Safe enables you to:

- Create password-protected folders as safe repository for all your files. Create as many protected folders as you need (with ISBE).
- Folder contents are encrypted for even greater protection.

NEW

New File Shredder

When you want to permanently delete confidential information, File Shredder is the tool you need.

Normal deletion isn't always enough to make your data disappear reliably. File Shredder deletes data securely using processes that prevent them from being accessed or recovered by someone else.

NEW

New Online Shield

Clicks happen quickly, that's why we've improved our Online Shield with cloud-based detection to identify dangerous downloads faster than ever.

- Files are checked before you download them to help ensure they are safe.
- And you stay protected if you are exchanging files using MSN, Yahoo! and ICQ.

LinkScanner

Infected web pages are a serious threat, that's why AVG Business protects you with LinkScanner.

- Every search result and web page is checked in real-time and you're alerted if anything suspicious is found.
- LinkScanner helps you to avoid clicking through to compromised pages.

Identity Protection

Hackers really want you to exploit your identity to their advantage. Identity Protection helps you retain control.

- AVG Business Editions analyze every program's behavior in real-time to determine if it's safe.
- You'll be protected against 0-day threats and malicious programs that could steal passwords, bank account details, and other digital valuables.

Email Protection

The ubiquity of email makes it a popular route for introducing malware into a business

- AVG Business Editions' detect infected or rogue inbound attachments and remove them to prevent damage to your PC.

Firewall

Protect your computer from rogue inbound and outbound communications with the firewall in AVG Business Editions

- Works on wired and wireless networks.
- Verifies that applications and processes that are trying to access the Internet are using the right ports and protocols.
- Detects attempted attacks, spoofing and port scanning.

Wi-Fi Guard

Say NO to data hijackers with Wi-Fi Guard

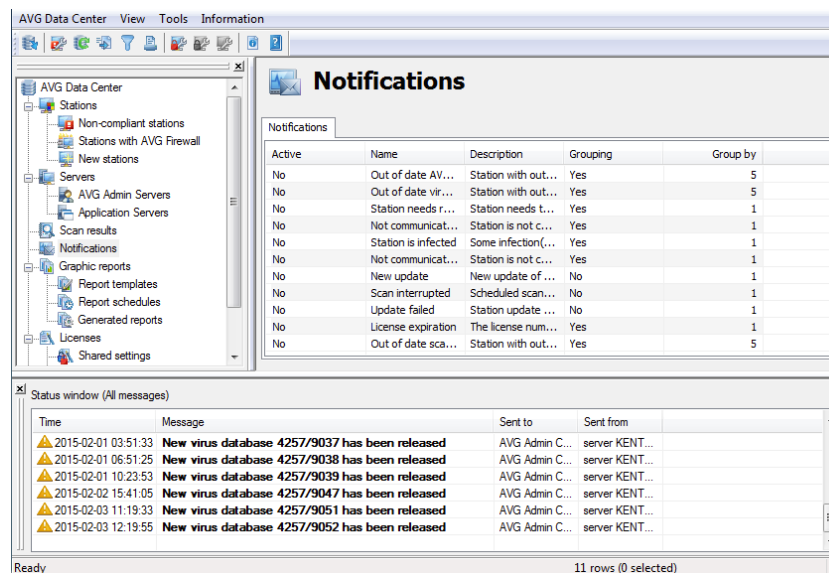

- Get an immediate notification if your laptop tries to connect to an unknown Wi-Fi hotspot.
- Helps to protect your passwords and other personal information from being exposed.

Remote Management

AVG Business Editions can be managed and deployed from a single interface across all your computers

- Manage your company's computers easily, efficiently and quickly.
- Centralized alerting and reporting keeps you apprised of your protection.

The screenshot shows the AVG Data Center interface. The main window is titled 'AVG Data Center' and has a menu bar with 'View', 'Tools', and 'Information'. On the left, there is a tree view with categories like 'Stations', 'Servers', 'Scan results', 'Notifications', 'Graphic reports', 'Report templates', 'Report schedules', 'Generated reports', 'Licenses', and 'Shared settings'. The 'Notifications' category is selected, and the main area displays a table of notifications.

| Active | Name | Description | Grouping | Group by |
|--------|---------------------|---------------------|----------|----------|
| No | Out of date AV... | Station with out... | Yes | 5 |
| No | Out of date vir... | Station with out... | Yes | 5 |
| No | Station needs r... | Station needs t... | Yes | 1 |
| No | Not communicat... | Station is not c... | Yes | 1 |
| No | Station is infected | Some infection(... | Yes | 1 |
| No | Not communicat... | Station is not c... | Yes | 1 |
| No | New update | New update of ... | No | 1 |
| No | Scan interrupted | Scheduled scan... | No | 1 |
| No | Update failed | Station update ... | No | 1 |
| No | License expiration | The license num... | Yes | 1 |
| No | Out of date sca... | Station with out... | Yes | 5 |

Below the notifications table is a 'Status window (All messages)' table:

| Time | Message | Sent to | Sent from |
|---------------------|--|----------------|----------------|
| 2015-02-01 03:51:33 | New virus database 4257/9037 has been released | AVG Admin C... | server KENT... |
| 2015-02-01 06:51:25 | New virus database 4257/9038 has been released | AVG Admin C... | server KENT... |
| 2015-02-01 10:23:53 | New virus database 4257/9039 has been released | AVG Admin C... | server KENT... |
| 2015-02-02 15:41:05 | New virus database 4257/9047 has been released | AVG Admin C... | server KENT... |
| 2015-02-03 11:19:33 | New virus database 4257/9051 has been released | AVG Admin C... | server KENT... |
| 2015-02-03 12:19:55 | New virus database 4257/9052 has been released | AVG Admin C... | server KENT... |

The status window shows 11 rows (0 selected).
